THE STUDENT GUIDE

Find a seat. *Keep it.*

NaviSpace shows which desks in the library are free right now, holds yours while you study, and helps you get more out of every sitting. It runs in your phone's browser: no app to download, no sign-up.

FREE TAKEN

02 Get a seat
Find, check in, keep it, step away, check out

03 Study better
Focus sessions, your week, the study board

04 Lost & Found and more
Lost & Found, notifications, your privacy

04 Quick answers
When something doesn't work

Keep it one tap away: add it to your Home Screen

iPhone (Safari): open the link, tap **Share**, then **Add to Home Screen**. Open NaviSpace from the new icon; only that way can an iPhone get reminders.

Android (Chrome): open the link, tap ⋮, then **Add to Home screen** (or accept the prompt).

FIVE STEPS

Get a seat, *keep it.*

1 Find a free seat

Open `MAP` to see every desk, live. The home page tells you how many are free and when the library is busiest.

FREE · TAKEN · STEPPED AWAY, HELD FOR SOMEONE

2 Scan the code on the desk

Every desk has its own QR code. Point your camera at it and tap `CHECK IN`. The seat is yours for 2 hours. The first time, you'll pick a nickname (no email, no password).

Only the code on the desk can check you in, so nobody can take a seat from across campus.

3 Keep your seat

About every 50 minutes the seat page asks *Still studying?* Tap `KEEP GOING` and the hold starts again. With notifications on, you also get a nudge 10 and 5 minutes before it would end.

4 Step away without losing it

Off to a lecture or for coffee? Tap `STEP AWAY`: the seat is held for you for 1 h 15 min. When you're back, tap `I'M BACK`.

5 Check out when you leave

Tap `CHECK OUT` so the next person can sit down. Forgot? The hold simply runs out, and every seat is released a few minutes after closing.

LIBRARY NEARLY FULL?

When only a few seats are left, the map and home page offer `NOTIFY ME`, for any seat or your favourite area. When one frees up you're told: whoever scans it first gets it.

SEAT LOOKS EMPTY BUT SAYS TAKEN?

Scan it and tap *This looks wrong — report it.* When 3 people report the same seat, it's freed for everyone.

ONCE YOU'RE SITTING DOWN

Study *better.*

FOCUS SESSION

A calm timer that keeps your seat

After you check in, tap `START FOCUS SESSION` on the seat page (or *Your focus session* on the home page). Your phone becomes a quiet clock over real footage while NaviSpace keeps your seat.

- **Scenes:** rain, ocean, night sky, a koi pond, or *Study with me*. Add gentle sound if you like.
- **Two ways to time it:** an open session that counts up, or Pomodoro: 25 minutes of focus, 5 of rest, with a soft chime between.
- **Encouragement** by name as you pass 15, 30, 45 and 60 minutes, and your personal best.
- **It keeps the screen on** and asks *Still studying?* for you. `STEP AWAY` pauses everything; `END SESSION` when you're done.

YOUR WEEK

Your own study record

On the home page: the days you studied this week, your streak of days in a row, your longest sitting and your favourite seat. It's kept only for this device and nobody else sees it.

STUDY BOARD

A friendly weekly ranking

One point for each day you study at a seat (however many seats you use that day), shown with your nickname. The board starts fresh every Monday, so anyone can top it this week.

BUSIEST HOURS

Plan when to come

The home page shows when the library is usually fullest (learned from how full it really gets) and the opening hours: Weekdays 08:00–20:00 · Fridays until 17:00.

MAKE IT A HABIT

Check in every day you study, even for a short sitting: that's what builds your streak and earns your point on the board. Pair it with a Pomodoro focus session and the hours add up.

EVERYTHING ELSE

Lost things *and more.*

LOST & FOUND

Lost something?

Found something? Post a photo and where it was. Lost something? Spot it on the board and claim it: you and the finder chat privately to arrange handing it back, or the finder hands it in at the front desk for you to collect.

NOTIFICATIONS

Reminders that matter

Turn them on from the home page (*Notifications*) for: your seat about to run out, a free seat when you asked to be told, and replies about a lost item. Each device is turned on separately. On iPhone, add NaviSpace to your Home Screen first.

YOUR PRIVACY

Only a nickname

No account, no email. The Privacy page lists what's kept and for how long, and DELETE MY DATA removes everything NaviSpace keeps for your phone in one tap.

Quick answers

"Check in" isn't there?

Scan the code on the desk itself; a link someone sent you can show a seat but not claim it.

No reminders arriving?

Turn notifications on from the home page and tap *Send a test*. On iPhone, open NaviSpace from the Home Screen icon.

The page says the library is closed?

Check-ins work during opening hours only. The page says when it opens next.

Still stuck?

Ask at the library's front desk: staff can see the floor and free a seat that was left behind.
